What Will It Cost

A person who has never tried out the "classified, way" in the Gazette, but who is about to do so, after old fashioned expensive methods have falled, usually asks, "What will it cost to advertise?" The person, who has already tried out these ads knows that the cost of advertising is but a trifle compared with the cost of not advertising.

Think this over. What is it costing you, per day, to be out of work, to be without a tenant for your house, apartment, furnished rooms, etc., to be operating your shop, store or farm without sufficient without sufficients to the resident without shop, store or farm without sun-clent help or to be going without other things that a classified at could bring you? Would the ex-pense of a little ad be greater than the expense incurred through frusting to luck to adjust these matters?

The man who has tried out the "classified way" once, usually does so again because he finds it the cheapest way there is. Try it.

West Frankfort, Ill., Aug. 7 —Sporadic rioting broke out again in West Frankfort this morning and Louis Carrari, 40 vears old, was shot and beaten to death. This is the first known death since the rioting began Thursday night.

West Frankfort, III., via Johnston City, III., Aug. 7.—Militia men continued to patrol the streets of West Frankfort today, but there were no indications of a recurrence of Thursday night's rioting. City and county officials agreed that the trouble apparently had passed over.

Brig. General Frank P. Wells, and Col. Frank Taylor, of the Illinols National guard, who have taken charge of the situation said they did not know just when the troops would be recalled.

Efforts of the national guard officers to learn the identity of 5 persons reported to have been killed in the rioting, were unavailing.

About 40 men, mostly Italians, were beaten by the rioters.

Mayor Lon Fox and Sheriff Robert H. Watkins said they did not believe any deaths resulted from Thursday night's lawlessness. The property damage caused by the outbreak will not exceed \$75,000, they asserted.

Campaign Management
But the usual early campaign dissensions are in evidence. No presidential contest would be complete without them. Parties change their mational managers so often that with each new chairman comes a new perspective. Murmurs are heard here about the acathy of the republican national columittee on the subject of pilgrimages to Marion. It is represented by some, for instance that the national committee hasn't arranged for enough delegations or handled properly some of those of an eachief its arrangements the other day because it couldn't get excursion rates.

quiet than he could on a moving train with crowds at every grossing and cheers at all hours of the night, with hand shaking and baby kissing and all the other obligations of campaigning which a candidate fulfills less he offend his prespective supporters.

At Home Until October

Senator Harding has put his foot down hard on the whole business. But the campaign managers in conference in New York and Chicaco are talking of speaking trips. The Harding headquarters answered a good deal of the talk by Issuing to-fave alist of engagements for front porch addresses for the remainder of August and a part of September. Certainly there will be no extensive tour until after Oct. I. Definite plans for the period thereafter will not be made until early in September when a survey of the effect of the first Cox trip will have been made.

can be no misunderstanding his words."

Senator Harding, as the candidate of the party, and Senator Johnson are as one on this question, and, as the letter expresses it, the republican party is committed both by niatrorm in the abstract and by its candidate in specification. The threatened revolt among leaders of the party is averted, but the minority position os expressed in the senate prevails as that of the party. In short, principle, as avowed in support of the Lodge reservations, or of the so-called mild reservations, has been surrendered to expediency.

Senator Harding makes this new pledge of policy in behalt of his party:

Harding for Quick Peace.

"I promise you format and ctfective peace so quickly as a republican congress can pass its declaration for a republican executive to

Senator Harding takes advice the bond it would be for the express the bond it would have anything to do with either of us.

This plan would not only be a problem of the interference of bunging diplomacy but plant, unadulterated dishonesty, as well.

No less an authority than Senator Lodge said, before the heat of recent controversy, that to make peace expenditure the activity of the rival dead of imitative impulse. Eccause Cox announces a big speaking tour, many republicans want, farding to do likewise.

The viewpoint here, however, is that Senator Harding can conserve his energy and give the issues of the campaign more thoughtful consideration in this hayen of peace and quiet han he could on a moving train with crowds at every grossing and cheers at all hours of the night with hand shaking and bay kissing and the other obligations of campaigned with the other obligations of campaigned with a conti

that those now-inveighing against an interest in affairs outside of America, criticised Prosident Wilson in unmeasured terms for not resenting the invasion of Isalgium in 1944. They term the feague of Nations'a military alliance, which, except for their opposition, would envelop our country, when, as a matter of truth, the subject of a League of Nations has claimed the best thought of America for years, and the League to Enforce Peace was presided over by so distinguished a Republican as ex-president Taff, who, before audiences in every section advocated the principle and the plan of the present League. They charge experimentation, when we have as historical precedent the Monroe Doctrine, which is the very essence of Article X of the Versailles covenant. Skepties viewed Monroe's mandate with alarm, predicting recurrent wars in defense of Central and South American states, whose guardians they alleged we need not be. And yet not a shot has been fired in almost one hundred years in prescring sovereign rights on this hemsisphere. They hypocritically claim that the League of Nations will result in our boys being drawn into military service, but they fail to realize that every high school youngster in the land knows that no treaty can overlide our Constitution, which reserved their own invention, and activity deposit to a solish and provincial spirit, forgetting that Lincoin fought a war over the purely moral question of slavery, and that McKinley broke the freedom of Cube, and carried the toren of American become a Messiah among the nations of the earth.

Playing With Fire.

Washington, Aug. 6.—Laironis to be put in order. The summa annual operating revenues in excess of one million dollars were ordered today by the interstate commerce commission to submit quarterly reports giving the number of their employes of various classes and the number of their employes of various classes and the number of the services rendered by them. The purpose of the order, it was explainful and the services rendered by them. The purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the purpose of the order, it was explainful and the world was on fire before we knew it. If sickens our senses to think of archy war came overnight, and the election this fall. Then organized government will be canabled to combine inpulse and facility in the making of better world conditions, submarines, airships, and poison submarines,

The first duty of the new administration clearly will be the ratification of the Treaty. The matter should be approached without thought of the bitterness of the past. The public verdict will have been rendered, and I am confident that the friends of world peace as it will be promoted by the loague, will have in numbers the constitutional requisite to favorable senatorial action. The captious may say that our platform reference to reservations is vague and indefinite. Its meaning, in brief, is that we shall state our interpretation of the covenant as a matter of good faith to our associates and as a precaution against any misunderstanding in the future. The point is, that after the people shall have spoken, the League will be in the hands of its friends in the Senate, and a safe index as to what they will do is supplied by what reservations they have proposed in the past. Some months ago, in a contributed article to the New York Times.

these words:

"In giving its assent to this treaty, the Senate has in mind the stact that the League of Nations which it embodies was devised for the sole purpose of maintaining peace and comity among the nations of the earth and preventing the recurrence of such destructive conflict as that through which the world has just through which the world has just passed. The "co-operation of the United Stales with the League and its continuance as a member thereof, will naturally depend upon the adherence of the League to that fundamental purpose."

Mr. McGowan expresses his view that the trend of the modern times has allowed a changed interpretation of the words of Apostle Paul, "Eyerybody must remain in the condition of life where he was called."

Mr. McGowan says: "Considering the condition of women in the New Testament era in respect to education, and what the common attitude toward her was, it doubtless was best for the growth of the church to respect to the common attitude to the church to respect to the common attitude to the church to respect to the common attitude agreement. strain women from public expression of their religious experiences. MOST BEAUTIFUL IN AMERICA CAR

THE first appeal of our five passenger "Glenbrook" model is, quite properly, its exquisite beauty and distinctiveness. To merely look at the car is a pleasing experience.

The second appeal develops upon acquaintance with one of the most remarkable power plants in the entire field of six cylinder engineering. Thus admiration is supplemented by profound respect and both appeals merge into Pride of Ownership.

This new Paige motor is an unusual achievement. It is the result of more than three years of patient research and experiment. It is actually and literally a product of our war time experience.

Furthermore this power plant is an altogether distinctive product-conceived by our own engineers and built in our own plants by our own workmen. It represents in fullest measure all that the Paige nameplate implies. the saystic

CONTINUED DRY SPELID WILL RUIN ALL CROPS

WILL RUIN ALL CROPS

WILL RUIN ALL CROPS

Local crops are greatly endangered by the long drought, according to A. Soudek of the Janesville Produce Co. Two weeks more of dry weather will almost totally ruin the potato crop.

At present potatoes are 50 per cent higher than they were last year at the same time and none from local producers. Almost all of the potatoes faneswille is using come from California and the castern states. "Either the farmers are holding the potatoes for seed or higher prices, or didn't raise so many as in other years," he says. "I came in from a trip through the country yesterday and although there are many acres of potatoes in they appear to suffer from the lack of rain. The little rain we have had was worse than none. Instead of thoroughly socking the ground, it rained just senough so that the sun could bake the carth."

dhe earth."

He declared that there is no way of estimating the potato ecop, everything depending upon the weather.

Eggs and Butter Scarce.

Soudek substantiated the prediction of scarce and high eggs and lutter by specific figures from the Chicago market. In Angust, 1919, there were 1,529,028 cases of eggs in storaged as against 2,165,912 on August 2 of this year—a, shrinkage of 25 per cent. On August 5 of 1919 there were in storage 78,000,000 pounds of butter, while at the same time in 1920 there were but 51,000,000 pounds—a shrinkage of over 40 per cent.

was thought only the; doctors and trainers could accomplish. But a way was found at the little town of Frenimere, and white it only lasted a short time, perhaps other ball players might want to try it.

Perring, Lathrop and Elliott went to the little town to help out Livingston and Platteville teams. On one of the days the management put on a broncho-busting exhibition to entertain the crowd.

He Bucked ami George Maves.

Now George's left leg warns him once in a while that when danger is near to start moving a little ahead of time. When Ferring saw that Green broncho buck with as green a rider on its back, he just naturally started to edge off the players bouch. However, he wasn't quick enough and that bronche just reared on his hind legs and came at George.

In a whird of dust, Perring surfted for the gate, the prancing steed behind him with a rider who could not steer. Full speed ahead was Perring's motio, limp and all, and he won the race.! to make his escape.

Health Officers Declares Bubble Fountains Are Mediums of Spreading Disease.

Attention is being called by the city health department to the condition of hubble fountains in the schools. Last year, the number of cases of sore throat that developed among the school children directed the attention of city health officer, Dr. F. B. Welch, to the possibility of the druking fountain as a source of contemporation.

of contamination.

Inspection of many of these fountains showed them to be unsafe, owing to the fact that the stream of vater did not extend over one half nell above the top of the bubbler

aread.
"The mushroom head vertical bubblers as used in the city schools are unsafe," said Dr. Welch, "unless sufficient volume and pressure of water are supplied, and due precautions taken that the water does not stagnate inside the bubbler head."

Spread Germs.

"Many children placed their lips por the drinking head, and this was particularly noticed where the water jets were low. The bubbler head is thus contaminated, and the germs are carried by the stream to the properly positioned mouth of the mext user."

properly positioned mouth of the next user."

Vertical drinking fountains can thus he as unsanitary as the common drinking cup, and can he a big factor in the spread of disease, especially among school children, it is said.

"Tarticular attention should be directed to the bubble fountains in the schools to see that they had adequate water supply, uniform pressure and cleanliness. Bubblers that cannot be readily cleaned," advises Dr. Weich, "should be prohibited. Slant stream bubblers should be used when possible. Running water should be available for the children who prefer to use individual drinking cups."

CITY WILL COLLECT **GARBAGE SAYS M'KUNE** ANSWERING GREEN

In answer to the Voice of the People in Thursday aight's Gazette, written by Elmer Green, Street Commissioner Thomas AlcKune stated this morning that the city would collect all garbage and that those wishing to dispose of it have only to tepphone to the city hall and a man will be sent after it. He said:

"Mr. Green is mistaken when he thinks the city does not handle the garbage. We dispose of a large amount of garbage. People who wish to have their garbage taken phone to the city does, who takes their name and the man calls once a week. The charge is 15 cents per week."

AROUND THE WORLD; FACING SUFFERERS NO, THEY WERE'NT GOING THAT WAY

They were only touring around in this part of the country—and most people thought they were going around the world. A touring car was in the city yesterday loaded with luggage and looking as if it had gone some distance. On the back there was a sign which said, "Around the World"—and most people stopped reading there. In small letters below was printed, "Is a h—l of aways—and we aren't going."

Tourists were never thicker in the city. Many of them just pass through and do not stop. Little Fords and big Packards are seen—some from Wisconsin and many from Hilmois. Some are even going west from New York via Janesville while Callfornia licenses are also seen. So-called "summer colds". are no more prevalent, according to a local physician, than the colds that come to people in the winter time. Infections colds come by the same channels in summer as in winter.

Quite a few people, however, suffer from the "rose cold" or that sneezing, eye-watering, coughing condition that goes by the name of hay fever. Dust, carrying the poller from certain flowers, will often bring on these summer afflictions. Ragweeds, such as are to be found along country roads, and on the outskirts

on these summer afflictions. Ragweeds, such as are to be found along country roads, and on the outskirts of the city, and which are coming to their own, do their share in irritating the mucous membranes of the nose and throat that are unusually sensitive. The great amount of dust due to the dry spell also has its affect.

Changes in temperature are often the cause of coids. One day will be so hot that everyone is anxious to wear as thin clothing as possible. Then at night the temperature will change, the cool winds being so refreshing that people forget to take the precaution of wearing a wrap. 'Atthough the medical books can explain the processes of "taking coid" through changes in temperature in a most learned, and complicated fashion, 'one local physician has reduced them to the simplest form, so that we can all understand just why we "catch" that-provoking coid that seems, somehow, to be out of place in summer.

Chilling of the body surface sends the blood away, and then there is a congestion of blood in the deeperlying organs. When the membranes of your nose and throat are thus congested, it is easy for germs to irritate the membranous surface. After this the cold can easily follow. MR. COX'S STUMP SPEECH.

Governor James Cox has accepted the nomination for the presidency. It took many words and many phrases. It is well to compare it with the state paper of Warren G. Harding. The difference between the men is emphasized by the Those differences are temperamental and basic. Senator Harding's speech was a dignified document, discussing issues, placing them in logical sequence, bringing to the fore new points of view, blazing new trails, or hewing out forgotten ones or ones from which the American people had gone astray. You knew that the league of nations as written in Paris was not acceptable and the dictum of the president that it should be adopted without the crossing of a "t" or the dotting of an "i" would be strenuously opposed by the republican candidate. And we know that If Squator Harding is elected and a republican congress is elected, the war will be ended by resolution and all the war measures auto- than if he merely lectured. His equipment commutically be wiped out, giving the senate ample sists of about twenty good modern paintings, the time with the president to enter into such inter- three national agreements as will not be contrary to American principles or entangle us in alliances with the eternal racial disagreements of Europe.

But Gov. Cox writes a stump speech. He ingly and inexpensively.

He reiterates the old story of democratic campaign poverty and all wealth being contributed for the republican ticket. good along in 1880, and again/in 1892, but it has been placed in the discard long since. He says that the great issue, the overshadowing one, is the confidence of the people in the government. That is true—it should be the great thing in a republic. But it has been shaken severely and put to the test in the last eight years of the Wilson dynasty. It was once true that the president did not acrogate to himself all the virtue of government and try to impose his will on all departments. We have lost confidence just to the extent of that encroachment on the duties and prerogalives of other coordinate branches by the execu-

At the beginning of the speech we are led to believe that Governor Cox is entirely in accord with the president on the peace treaty and that he is willing to accept the president's stubborn resistance to any reservations as final. Later in the reading, we are not so sure. After Mr. Cox's diatribe against the senators who opposed the president and his stump speech asking sympathy for Ar. Wilson we gather that the candidate is willing that some reservations be made safeguarding America. It would seem that Mr. Cox has been unfortunate in his language here. The issue on the league of nations presents three angles only-one the acceptance by the senate of by the president, a position clearly opposed by the republican platform and in which position Mr. Harding is in complete accord; (2) the ac-Lodge character, or (3) refusal to accept the treaty at all in its present condition and a belief that it is honeless to at any to patch the treaty is as helpless, if not so unrestrained. that it is hopeless to ac apt to patch the treaty together. Mr. Ross Crane, head of the extension department of the institute, is about to start upon his yearly pilgrimage of spreading art and culture in the rural districts, and this time, in addition to his demonstrations of the Home Beautiful, he will give the rural ladies a few pointers on the Woman Beautiful. That is, he and Miss Evelyn Hansen, dress demonstrator at the Wisconsin Hansen, dress demonstrator at the Wisconsin Hansen, dress demonstrator a series of talks State Normal school, will give a series of talks illustrated by dress exhibitions on living models. they will endeavor to teach their fair audiences how to bring out their often only too

The extension department of the art institute is really a very serious and most praiseworthy organization. Three years ago Mr. Crane evolved an idea which was so big and so obvious that one wonders why no one ever thought of it before. It was simply that since a great part of the population of the country was unable to visit the big art museums in the cities, art should be taken to the people. The result of this happy thought was the extension department of the institute. the only thing of its kind in the country.

Every year Mr. Crane with three or four assistants and about a ton of material, sallies forth to the hinterlands of culture and there proceeds to make life more beautiful for the natives. It is a fact worthy of note that these people who have been geographically deprived of beauty are more appreciative of good art when it is brought to them than is many a superior-feeling metropoli-They are so enthusiastic about Mr. Crane that many towns have sent for him two or three times. He has tectured all the way from Texas to Winnipeg, leaving a trail of beauty in his wake. Little Bock, Arkansos, and Fort Wayne, Indiana, have alike been brightened by his pres-ence. His work has become so popular that he has had to send out a second group of evangelists with Hunt Cook as the leader and a duplicate ton of material.

This tou of material is probably the reason for Mr. Crane's great success. With it he dramatizes his talks on beautifying the home, and thus makes a much greater impression upon his audience walls, fireplace, doors and windows of a model room. He puts this room up on the platform of the auditorium where he is lecturing, and proceeds to show the expectant townsfolk; and neighboring farmers how to furnish it pleas-

Many an eager 'home-maker' rushes to their shops the next day to buy rugs of a less flamboyant design, hangings that have some remote relation to the color of the walls, and chairs that seem to have been made to sit upon rather than to torture the eye. Thus we see how beauty and commerce can be made to go hand in hand, certain lofty souls to the contrary.

In fact it is one of Mr. Crane's objects to bring trade and beauty into luarmony. He wants to influence manufacturers and merchants to make and sell beautiful things no less than he wants people to choose beautiful things for their homes. According to Mr. Crane art isn't something that you hang up on the wall in a frame, or seek out

"Art is not an abstraction," says Mr. Cranc.
"Unless you show people how art makes itself useful in their lives they are not going to accept it as anything more than a luxury. America is just beginning to realize the value of beauty as a vital part of life. ABIDING T HE HEAT

Infants suffer seriously and in many cases fatally from the intense head of the summer. Many mothers keep babies clothed with hot wool shirts and even additional swathings of woolen bahds throughout the dogskys—lest the infortunate little once "take cold"—and if a glimmering of common sense does prompt the removal of these sweltering garments the saireygamps never fall to nip the impulse with their dire superstitions. It seems, strange that white philanthropic organizations are spending money to provide represent where infants may be kept cool in the hot-mid-summer weather, unenlightened mothers everywhere are deliberately striving to keep their babies warm in such weather, their babies warm in such weather. The mounting death rate among infants in hot weather is chiefly due to improper keeping and preparation of the food, of course, but the fants in hot weather is chiefly due to improper keeping and prepara-tion of the food, of course, but the mere heat contributes much toward QUESTIONS AND ANSWERS.

Kimball's store appeal to your patrontage is backed by something more than mere price inducement, although our values will always bear closest comparison with values offered anywhere. It is backed by a character of service which is important and valuable to you because it is helpful, qualified and sincere. Whether you need the furnishing of one room or an entire home and whether your home be modest or pretentious you can come to our store knowing that you are going to have competent co-operation in working out the ideal you have in mind.

You have the assurance that through the years to come the service rendered you is going to mean much to you in satisfaction and your own comparison of values will convince you that quality for quality our prices are even less than you would have to pay in many places. It is always a pleasure to us to discuss home-furnishing problems with those who are interested.

PATERSON SIX

The Car of Greater Values

The Paterson car is distinguished but dignified; conspicious, yet sedate.

It is Paterson policy to be progressively conservative. For this reason, the Paterson is always in style, yet always in good taste; it is modish without being freakish. The Paterson is for people who wish to drive the same car' for a number of years without having its appearance rendered obsolete by succeeding models.

With stability of appearance is combined stability of mechanical design. Major units are of standard and proven quality, so radical changes will never be necessary.

Fair comparison will prove the Paterson to be "The Car of Greater Values." Arrange for a demonstration and judge for yourself.

On next Tuesday morning at 8:30 the first players will tee off in the United States Golf association open championship which will be held at the Inverness club, Toledo, O.

Many amateurs are entered in this tournament and with some of the calibre of "Bobby" Jones of Atlanta, Grantiand Rice of Englewood and Sherrill Sherman of Utica, N. Y.

"Bobby" Jones will have a hard fight of it right from the start as he is paired up to meet Harry Vardon, star golfer of England in the opening round of play.

Harry Robinson, the Janesville country club pro, who covered (the course at Olympia fields in the Western open golf championship in 322, will play in the Toledo meet. He has already arrived there.

Williams,-Brumm and Elliott May Play on Wisconsin Eleven

This year's football team of the University of Wisconsin is going to it a tough proposition for the other teams of the "Big Ten" if all predictions to make a new being made come true to form.

Alter is expected to come from Rollie Williams. Edgerton, the all car forward of the Lakota Cardinals, Janesville basketball team. Although Rollie led the university last spring for business reasons, he has all expectations to go back to Madison and made a strong bid for a backfield position. While on the frosh eleven last year. Williams proved a sensation. Bieberstein, Owen, Gude and Nelson, in games with the varsity, he often made holes through the defense for a gain of 70 yards.

a gain of 70 yards.
Rollic's Twister
Rollie's form is peculiar to him-self. He uses a whirling pivot that material for Couch Richards to work upon. The all-state back, Johnson of Ripon, will probably go out. Those Who Are Gone.

As to the old men of the eleven, Jacobi is lost by graduation. Fladoes, Carpenter and Meyers are gone from the line. The stuff for filling their places is heavy, however, and the chances are bright for new blood to fill them well. The matter of eligibility hangs over the head of Grand hards of the Oble game last

no man, or group of players, it appears has been able to stop. It is the same form that startled basketball fans of the state into great shouts of amazement as he tore down the floor to shoot a basket or pass to the waiting arms of a team-mate. Like a tornado, he turns a top-like movement that has pounds of pressure behind it to tear great gaps in the line of opposing football teams.

Elliott, now playing without pay with the Samson Tractor baseball team, is another locally known star. One of the fastest men in the Badger backfield, he is looked upon to repeat his former performances.

Then there is "Kybo" Brumm, that big, lanky center of the Lakota baseball squad. He's due back again this year to make a game tryout for the varsity and is expected to land on the team.

RUTH ADDS 2 MORE TO MAKE TOTAL 41

That Tarzan of Swat is still at it. Yesterday Ruth collected two home runs to bring his total for the season to 41. The forty-first was his second in two days and sixth on the western trip. Two men were on bags when he connected in the sixth inning. Quinn was hit hard and the Yankees defeated Detroit 11 to 7. Dick Kerr, the pitcher of Chicago, who fooled "Babe" Ruth and whom the Simmons Bed Co. of Kenosha has tried to buy over, yesterday won his own game and defeated Boston 4 to 3. In the tenth, Kerr singled to score the winning run.

The prices have ranged from 18 to 25 cents, according to type. There is no stampede to get this tobacco, but within the range of these figures the balance still unsold will gradually find its way to the market. The assorting season is over. In Edgerton the Spitzner company, which has put in 30 weeks of lively work this season, expects to be through by the end of this week. On the whole the assorting and pack-On the whole the assorting and packing of last year's crop have been satisfactory. The wages have been good and steady and experienced sorters have made good money. The tobacco packed may not be the best Wisconsin has produced, but it is a good crop, coming through the sweat in good shape and worthy of cordial reception by the manufacturers who need the Wisconsin leaf. The prospects of the 1920 stand depend on early rainfull. The first plantings are in bloom, and some fields have been topped. Dort specifications disclose certain materials, systems and units common only to cars that cost more.

Checking up these features against other cars classed with the Dort because of price, you will find few in any of them and all in none of them.

These superiorities invariably appear at points which involve the heart of five all-important qualities-namely simplicity, accessibility, dependability, low cost of maintenance and slow depreciation.

The Dort is a practical car and performs its duties with regularity and efficiency.
